PROFESSIONAL SUMMARY

Software Engineer with over two years of professional experience building modern web applications using JavaScript and TypeScript. While my experience has primarily been in frontend engineering, I have developed full-stack applications using Node.js, Express.js, Prisma, and RESTful APIs, and I am intentionally building deeper expertise in backend development. Passionate about designing scalable backend services, authentication systems, database-driven applications, and clean software architecture. Eager to contribute to engineering teams while continuing to grow as a backend developer.

TECHNICAL SKILLS

- **Languages:** JavaScript(ES6+), TypeScript, HTML, CSS, SQL (Basics), Python (Basic)
- **Backend:** Node.js, Express.js, Prisma, REST APIs, JWT, Postman
- **Database:** PostgreSQL, MongoDB
- **Frontend:** React, Next.js, Vue.js, Tailwind CSS, Shadcn UI, Responsive Design
- **Tools:** Git & GitHub, Jest, Tanstack Query, Redux Toolkit

EXPERIENCE

Software Engineer (Frontend Focus) | Hy-Initiative Limited

04/2025 – 07/2026

- Developed the WESOnline marketplace and mentorship platform, enabling skill acquisition and institutional partnerships (e.g., 3MTT, NSE, FUWukari), improving user retention by 35%.
- Collaborated closely with backend engineers to integrate, test, and troubleshoot RESTful APIs while maintaining code quality across multiple products
- Improved frontend-backend communication by reducing unnecessary API requests by 30%, resulting in faster application performance and improved user experience.
- Implemented multilingual support (French/Arabic) for the CITN Admin Dashboard, improving accessibility for a broader user base.
- Built and maintained the DigiSpray Admin Dashboard for user, event, and content management.

Software Engineer (Frontend Focus) | NoonPrep

03/2026 – 07/2026

- Developed production features for a simulation-based examination platform serving students through practice sessions, analytics, and real-time quiz challenges.
- Collaborated with backend engineers to integrate RESTful APIs, authentication workflows, and real-time communication features.
- Built personalized dashboards, timed examinations, learning resources, analytics, and interactive challenge systems to improve learner engagement.
- Participated in continuous feature delivery, testing, debugging, and deployment within an agile development environment.

Frontend Developer | Uptick Talents Labs Limited

12/2025 – 02/2026

- Led frontend development of the Jooav ERP platform supporting procurement, inventory, and order management workflows.
- Implemented role-based access control (RBAC), responsive layouts, and reusable UI components using design tokens.
- Integrated inventory management, reporting, and procurement workflows through RESTful API consumption and close collaboration with backend developers.

Frontend Developer | M15 Innovations

02/2025 – 03/2026

- Built Greysoft, a multi-tenant School Management System architecture with secure domain-based routing and role-based authentication.
- Developed dynamic dashboards and real-time messaging for students, teachers, and admins to improve school interaction and engagement.
- Collaborated with cross-functional teams to deliver scalable, responsive, and maintainable software for multiple tenant environments.

Frontend Developer Intern | Uptick Talents

11/2024 – 03/2025

- Developed features for the GetCassava marketplace, improving digital access for agricultural businesses
- Built responsive user interfaces while integrating backend APIs and resolving production issues during development sprints.
- Participated in code reviews and collaborated with engineers to improve application architecture and code quality.

PROJECTS

Full-Stack Course Registration Platform (*Next.js – Node.js – Express.js – Prisma – PostgreSQL – NOWPayments*)

Built a full-stack course registration platform featuring cryptocurrency payment integration, user registration, backend payment verification, dynamic pricing, discount management, and automated email notifications using RESTful APIs.

Greysoft School Management System (*Next.js – TypeScript – Redux – REST APIs – Socket.io*)

Developed a multi-tenant school management system featuring role-based authentication, secure domain routing, real-time messaging, and dashboards for administrators, teachers, students, and parents.

Mini Mart (*Node.js – Express.js – MongoDB – JWT*)

Built a full-stack e-commerce application implementing JWT authentication, protected routes, shopping cart, wishlist functionality, dummy checkout flow, and RESTful APIs for product and user management..

NoonPrep(*Next.js – Typescript - Redux - Tailwind – ShadcnUI – Socket.io*)

Lead the Frontend development of a Simulation based exam practice and preparation application, building features supporting exam sessions, solo quizzes and live challenge with users across the app, improving learning and study outcomes by 45%. [View project](#)

WESOnline (*React – Mantine UI – Tanstack – Typescript*)

Contributed to the development of a production mentorship and learning platform by implementing responsive interfaces, integrating backend APIs, and delivering features supporting institutional learning programs.

EDUCATION

B.Eng. Civil Engineering | Federal University of Technology, Owerri (FUTO)

2018 – 2024

Transitioned into Software Engineering through self-learning, bootcamps, and hands-on projects.

CERTIFICATIONS & TRAINING

- 3MTT Full-Stack Software Development Training (2025)
- Havard's Computer Science Foundation Course - CS50x (2025)
- Access Bank & Career X Backend Training - (2025)
- Uptick Talents Software Engineering Program (2024)
- Jobberman Soft Skills Training (2025)

LANGUAGES

- Fluent: English, West African Pidgin.
- Others: Igbo, Yoruba.

REFEREES

- Mr. Kingley Ajaezo – Frontend Mentor, Uptick Talents
- Miss Perpetual Meningwa – Full Stack Developer (+234 806 9683 219)
